Highlights of Consolidated Operating Performance (2)

- **Life Insurance Business** : Ordinary revenues increased year on year due to an improvement of investment performance in the separate account following a recovery in the financial market conditions. Investment gains were recorded in this first half compared with investment losses in the same period of the previous year. Ordinary profit decreased year on year due to a deterioration in net gains/losses on derivative transactions to hedge market risks for available-for-sale securities and lower gains on sale of securities in the general account.
- **Non-life Insurance Business**: Ordinary revenues expanded year on year owing to an increase in net premiums written for mainstay automobile insurance. Ordinary profit increased year on year due to a decline in the loss ratio, driven primarily by a lower car accident ratio.
- **Banking Business** : Ordinary revenues increased year on year due to an increase in interest income on loans in line with a favorably growing balance of mortgage loans, and an increase in interest income on securities. Ordinary profit increased year on year, due to a decrease in operating expenses, especially in advertising expenses for the card loan business.
- Consolidated ordinary revenues increased 12.1% year on year, to ¥708.3 billion, owing to increases in ordinary revenues from all the businesses: life insurance, non-life insurance, and banking businesses. Consolidated ordinary profit decreased 12.0%, to ¥32.6 billion. By business segment, ordinary profit from the life insurance business decreased whereas ordinary profit from the non-life insurance and the banking businesses increased. Profit attributable to owners of the parent was down 14.0% year on year, to ¥21.5 billion due to the decrease in consolidated ordinary profit.

Highlights of Operating Performance: Sony Life (Non-consolidated)

□ Ordinary revenues ■ Ordinary profit

- ◆ Ordinary revenues increased but ordinary profit decreased year on year.
- ◆ Income from insurance premiums was flat year on year due mainly to a decrease in sales of single premium whole life insurance although policy amount in force increased.
- ◆ Investment income increased due to an improvement of investment performance in the separate account and higher interest income and dividends in the general account.
- ◆ Ordinary profit decreased year on year due to a deterioration in net gains/losses on derivative transactions to hedge market risks for available-for-sale securities and lower gains on sale of securities in the general account.

□ Consolidated ordinary revenues
■ Consolidated ordinary profit

<Consolidated>

◆ Ordinary revenues increased year on year due to an increase in interest income on loans in line with a favorably growing balance of mortgage loans, and an increase in interest income on securities. Ordinary profit increased year on year, due to a decrease in operating expenses, especially in advertising expenses for the card loan business.

<Non-consolidated>

◆ Both gross operating profit and net operating profit increased.

- Net interest income increased due to an increase in interest income on loans and interest income and dividends on securities.
- Net fees and commissions decreased due mainly to lower fees and commissions on mortgage loans, in addition to higher fees paid for loan guarantees reflecting the growing loan balance.
- Net other operating income decreased due mainly to a decrease in gains on foreign exchange transactions.

<Reasons for changes>

◆ Increased in yen ordinary deposit balance due mainly to an increase in newly accumulated funds via the increased number of accounts, as well as the conversion from foreign currencies backed by yen depreciation.

◆ Increased in the U.S. dollar-denominated time deposit balance due to the promotional effect from the rise in U.S. interest rates, despite the conversion into yen led by a shift in the trend from yen appreciation to yen depreciation.

◆ Rose due to a steady increase in mortgage loans, despite a leveling off in demand for refinancing these loans.

*1 Loans in others include corporate loans of ¥62.4 billion

*2 Non-performing loans (loans based on the Financial Reconstruction Act) / Total loan exposure

*3 Please refer to the graph of the non-consolidated capital adequacy ratio (domestic criteria) on page 26.

The following adjustments are made to the figures on a financial account for profits and losses more appropriately.

*1: Net interest income: Includes profits and losses associated with fund investment recorded in net other operating income, including gains or losses from currency swap transactions.

*2: Net fees and commissions: Includes profits and losses for customer dealings in foreign currency transactions recorded in net other operating income.

*3: Net other operating income: After the above adjustments (*1 and *2), mainly consists of profits and losses for bond and derivative dealing transactions.

■ Core profit

Profits and losses exclude net other operating income, which includes those on bond and derivative dealing transactions, and stands for Sony Bank's basic profits.

<Segment information for ordinary revenues and ordinary profit>

■ Life Insurance Business

In FY17.1H, ordinary revenues exceeded our initial expectations, as an improved market environment promoted an increase in investment income in the separate account. Ordinary profit was in line with our forecasts at the beginning of the fiscal year.

Negative factors included the fact that anticipated sales of securities did not occur, as well as worsening profits on derivative transactions related to minimum guarantees for variable life insurance. Among positive factors, a lower-than-expected level of new policies lowered initial-period costs, and operating expenses were shifted to a different period.

We maintain our forecast for the full-year, taking into consideration the business environment from FY17.3Q onward.

■ Non-life Insurance Business

In FY17.1H, ordinary revenues were essentially in line with our expectations. Ordinary profit for FY17.1H exceeded our expectations as the loss ratio was lower than our initial expectations.

We have revised upward the full-year forecast after partially revising projections in the loss ratio and the expense ratio from FY17.3Q onward, and reflecting operating results in FY17.1H.

■ Banking Business

In FY17.1H, ordinary revenues and ordinary profit were essentially in line with our expectations, so we maintain our full-year forecasts.

New business margin	3.8%	4.6%	6.4%	5.5%

Notes:

1. Calculated MCEV as of June 30, 2017 onward by using updated economic assumptions and lapse and surrender rate from March 31, 2017.
2. New business value is calculated accumulating new business value for each month based on economic assumptions at the end of each month.

◆ Reasons for changes in MCEV

- MCEV as of September 30, 2017 increased ¥44.9 billion from June 30, 2017 due mainly to a rise in interest rates in Japanese yen.

◆ New business value/ New business margin

- New business margin for FY17.2Q (3M) was up 1.8 percentage points from FY17.1Q (3M), due mainly to a change in product mix and a rise in interest rates.
- New business value for FY17.2Q (3M) was ¥17.2 billion, up ¥4.9 billion from FY17.1Q (3M), due to a rise in new business margin.

Method of Measuring Risk Amount Based on Economic Value (1)

■ Market-related Risk*1

	Sony Life	(Reference) EU Solvency II Implementing Measures (Delegated Regulation)
Interest rate risk Fluctuations in net asset value based on economic value in response to the shocks in the right columns. The same applies below.	Percentage increases or decreases differ for each currency and term. As for measuring interest rate risk in Japanese yen, introduced principal component analysis, where yield curve changes are disaggregated into three components, parallel shift, twist and butterfly, and the yield curve is shocked by each component. (Example) For Yen 30-year, 64% decrease (parallel shift), 19% decrease (twist), 4% decrease (butterfly)	Different percentage changes in interest rates are set for each term, from one year to 20 years. For terms longer than 20 years and through 90 years, percentage changes are set using linear interpolation, with negative 29% as the percentage change for 20 years and negative 20% as the percentage change for 90 years
Equity risk	Listed equities 45%, Other securities 70%	Global 39%, Others 49%*2
Real estate risk	Actual real estate 25%	Same as on the left
Credit risk	Credit risk = (market value) x (risk coefficient for each credit rating) x duration Note that durations have caps and floors, depending on credit ratings. (Example) Rating A: Risk coefficient (1.4%), cap (23), floor (1)	Credit risk = (market value) x (risk coefficient for each credit rating and duration) (Example) Rating A: Duration (Dur): 5-10 years Risk coefficient=7.0% + 0.7% x (Dur - 5)
Currency risk	35% downside fluctuation	25% downside fluctuation

◆ Revision in the risk factors of market-related risk

- In FY17.1Q, Sony Life partially revised the risk factors of market-related risk.
- Regarding interest rate risk in Japanese yen, the rate of change in interest rates for 40 years or less was updated based on recent market data, and the rate of change in interest rates beyond 40 years was revised, taking into account such factors as ICS^(*3) deliberations. The main result was a decrease in interest rate risk compared with March 31, 2017, due mainly to a decrease in the rate of change in Japanese yen beyond 40 years.
